

Small Business Legal Coaching

For Business Coaches & Allied Professionals

Legal compliance is a big issue for small business. It covers everything from business structures and partnership agreements, to IP and brand protection. Many business owners don't know how vulnerable their businesses are, and those that have some idea, aren't sure where to begin.

How can Legal HQ help?

By combining our **Small Business Legal Coaching** with *your* existing service, your clients can receive the comprehensive support they need.

What do we offer?

1. Core Presentations

These focus on the most common problem areas for small businesses. *Choose from:*

- **Brand Protection** – How Trade Marks, Copyright & Design registration can guard your brand.
- **Identifying & Commercialising your IP Assets** – Understanding the value in your content and how to make money from it safely.
- **Business Structures and Directors' Duties** – A closer look at the differences between sole traders, partnerships, companies and not-for-profit options.
- **Policies, Contracts & Documentation** – What you need, and when you need it.

2. Tailored topics to meet your clients' particular needs.

These might include industry specific issues, research & development, marketing, website considerations, or a selection of questions on notice.

Either approach can be presented to large groups or in a smaller workshop format according to your requirements.

Before you plan your next event, [contact](#) Georgia Thomas to discuss how we can work together to bring the best possible service to your clients. POA
